

MU 4-ZG/...

Collinear 4 dB Mobile Antenna for the 450 MHz Band

- 4 dB mobile antenna with collinear, stainless steel whip with 8 mm thread joint.
- Models with ZG-mount or MZG-magnetic mount.

DESCRIPTION

- Choice between ZG-mount with FME-connection (supplied without cable) or ZGP4-mount with 4 m factory fitted cable (terminated with FME-connector).
- MZG-models are provided with FME-connection directly on the mount (supplied without cable).
- Choice between general purpose tunable models and permanently tuned models for cellular systems.

Whips from the ZG/ZGP4 mounts and the MZG-mount are **NOT** compatible.

INSTALLATION

The antenna whip comprises a $\frac{1}{4} \lambda$ section, a phase shifting coil, and a $\frac{1}{2} \lambda$ section. The ZG-mount is designed for mounting from the outside in a 21 mm dia. hole on horizontal surfaces as e.g. roof top or trunk lid.

The mount is provided with an M8 x 1 thread mount system. This construction meets the demand for a low-profile mobile mount with a slim appearance and with protection against theft of the antenna whip.

When cleaning the car in car-washing machines, the whip is easily removed using a spanner, size 12 mm. The whip is refitted again by screwing it onto the thread stud and tightening it with the spanner.

The MZG-mount antennas are provided with a large-diameter, thoroughly magnetized permanent ring magnet with an extraordinarily high attaching effect. A silicone layer applied to the whole contact surface protects the car roof and ensures maximum friction.

Please note that whips from the ZG/ZGP4 mounts and the whips from the MZG-mount are not compatible.
